PLANT ACCOUNTANT

About the Position:

- Reporting to the Financial Controller, the Plant Accountant performs a wide variety of accounting and financial reporting tasks including gathering, analyzing, and recording transactions. Supervises the spare parts warehouse activities and leads the accounting systems upgrades.
- Preparation of monthly billing.
- Responsible for monthly operating expense report by department, including the distribution to the budget owners; validation of the variance explanations and the account projections.
- Responsible for spare parts reconciliation on a monthly basis.
- Responsible for the capital projects and closing including USGAAP compliance. Among other responsibilities.

JOB QUALIFICATIONS:

- BBA with a concentration in Accounting, MBA/CPA or engineering, desirable.
- Experience in technical accounting and tax.
- Five (5) years of progressive financial experience. Should be a hands-on individual willing and able to personally perform every element of this job description.
- Strong analytical, communication and interpersonal skills.
- Experience in personnel management.
- Proficiency in accounting systems.
- Proficiency in MS Office.
- Strong leader, a self-starter with entrepreneurship skills.
- Fully bilingual English and Spanish.

We offer excellent compensation and benefits package, a great work environment, and a comprehensive development program.

We will accept resumes until February 4, 2022. All qualified candidates please send resume by email to the following electronic address:
